

MITSUI PLASTICS, INC.

EverGlide® PA PFAS-Free Processing Aid for Extrusion Applications

EverGlide® PA is a PFAS-free Polymer Process Aid solution made by a reactive process with controlled functionalization and high purity. It balances both internal and external process aid properties by providing coating to the metal surface of the die and allowing easier movement of the polymer chains during the melt process.

Properties:

- High thermal stability & recycling friendly
- Supplied in masterbatch form
- Tailored active ingredient content
- Different carriers possible (PE, PP, PA, PET, EVOH, etc.)

Performance:

- Reduce melt fracture & die buildup
- Improve output & lower energy consumption
- Smooth surface & high film clarity
- High dyne retention over time
- Non-migratory, no impact on sealing

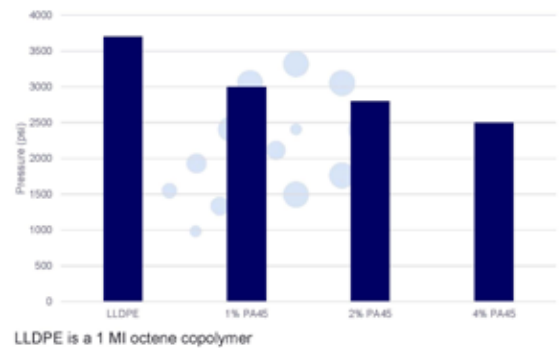

Regulatory:

- Global food contact compliant with no restrictions based on food type
- ISO10993 compliant for Medical & Hygiene
- REACH registered & RoHS compliant
- Health Canada and Mercosur registration
